

Micro Centrifuge tube

- ✓ The duckbill cap reduces the pressure required to open the tube with a wider contact surface yet ensures the cap will remain closed during centrifugation
- ✓ Manufactured from virgin polypropylene these microcentrifuge tubes ensure sample integrity during boiling, freezing, and centrifugation
- ✓ Sterile product is certified free of RNase, DNase, DNA, ATP, bioburden and endotoxins.
- ✓ Nonsterile product is certified free of RNase, DNase, DNA and pyrogens
- ✓ Recommended for daily laboratory usage including centrifugation and short-term sample storage.

Order Information

| Cat. No. | Product | Max. RCF | Capacity | Bottom | Sterile | Packing | Qty. per bag/case |
|-----------|-----------------------|----------|----------|---------|---------|----------------|-------------------|
| MCF000015 | Micro Centrifuge tube | 16,000 | 1.5 mL | Conical | ● | Resealable bag | 500 / 10 |
| MCF001015 | Micro Centrifuge tube | 16,000 | 1.5 mL | Conical | | Resealable bag | 500 / 10 |
| MCF000020 | Micro Centrifuge tube | 16,000 | 2.0 mL | Conical | ● | Resealable bag | 500 / 10 |
| MCF001020 | Micro Centrifuge tube | 16,000 | 2.0 mL | Conical | | Resealable bag | 500 / 10 |
